

Barely-Legal Shotgun

Installation :

- 1- Download Equinox407's Mossberg 500
- 2- Select 'Red shells' and no shells on side configurations to ensure compatibility
- 3- Put all files into your patchday8ng file in
mods/update/update.rpf/dlc_patch/patchday8ng
(This folder won't be in the game by default I believe, but it is part of the OIV in the VF semi auto pistol mod.)
- 4- Install these textures.
- 5- Put textures in patchday8ng. (same folder you put the models)
